Serious Equipment for Serious Work

Pharmasolutions

Pharmasolutions is a comprehensive drug development and testing service available from SPI Pharma. Unlike a CRO, we are an ingredients manufacturer with materials and functionality expertise. Expand your product's life cycle possibilities. Reduce trial and error. Get to market faster.

SPI Pharma houses a full-fledged development lab with capabilities including:

HPLC/UPLC	Roller compactor	Dissolution USP II
Soft Gel	Instrumented tablet press	Disintegration Apparatus
Blister packaging	Bottle packer	ICH chambers and instrumentation to assess the physical properties of solid dosage forms
Spray dryer	Stick pack/sachet packer	
High shear granulator	DSC	

How It Works

Pharmasolutions is a fee for service business model. We set mutually agreeable milestones based on QbD process and you pay for the successful completion of those milestones. The plan is flexible. You can choose parts of the solution or a complete package- whatever **makes a difference** for your team.

Why Outsource Your Drug Development Project?

SPI Pharma houses a full-fledged development lab with capabilities including:

SPI Pharma combines our proprietary excipients with your API to create your new product. We offer complete solutions through versatile and cost effective options for your generic, NCE, nutraceutical and OTC products. We specialize in unique and oral dispersible dosage forms. Our patient friendly dosage platforms include a line of taste masked actives.

Track Record

We have developed a database that reduces trial and error to bring your product to market faster. Examples are available in the Pharmasolutions sell sheet. Your success is our focus.

Experience and Talent

Our development lab features a team of pharmaceutical scientists with over 95 years of combined formulation experience from big pharma as well as mid-size branded and generic labs. The team is dedicated to formulation development, application research, analytical development and analytical validations (non-GMP).
