Patient Friendly Formulations

Easy to Dose Drug Delivery

Medication is only effective if it is taken properly. Giving an ODT/ODP form to a patient versus a liquid ensures accurate dosing. These forms are highly portable and do not require water, adding significant convenience.

Effective delivery of drugs is a key differentiator for oral dose. SPI Pharma brings expertise and experience to the challenge. The result is premium platforms for unique ways to deliver doses.

Orally Dispersible Technologies

Taking medication should not be a daunting experience. Orally disintegrating tablets (ODT) and powders (ODP) are a preferred dosage form for anyone with difficulty swallowing; especially making a difference to the geriatric and pediatric patient populations. Improve your patients' experience with Pharmaburst™ ODT, Pharmasperse™ 416 ODP, Advantol™ 300 Fast Melt, and Compressol™ SM Soft Melt technologies.

Excellent Organoleptics

Our platforms provide a smooth texture and a refreshing cooling sensation that can help to counter the poor taste of some APIs. Compliance is increased due to pleasant taste and mouthfeel.

Reduce Manufacturing Costs

Consistent Performance

Orally dispersible powder technologies offer particles with consistent content uniformity. ODTs are highly compactable, requiring lower compression forces and reducing stress applied to multiparticulates. Accuracy is ensured in each dose.

Streamline Manufacturing

Less excipients are needed in the formulation resulting in fewer ingredients to handle, test and inventory. Manufacturing only requires dry blending with the API and the appropriate levels of sweeteners, flavors, and colors using standard process equipment. Accelerate your project to the next milestone.

Platform	Dosage Form					
	Chewable Tablets	ODP	ODT	Lozenges	Fast Melt Tablets	Swallow Tablets
Advantol™ 300	X		X		X	
Compressol™ SM	X			X		X
Pharmaburst™			X			
Pharmasperse™		X
